Updated:	09/15/2013	Due date:	
Subject:	Add a "wizard" mode for the Shepard GUI		
Description			
<p>The current GUI is set up in more of an "expert" format, where all of the options for controlling the hardware and GUI are immediately available. It would be good for many situations though to have the control options simplified into a guided, step-by-step format. The steps would be:</p> <ol style="list-style-type: none">1. Connect2. Calibrate3. Set Test Notations4. Record5. Stop Recording6. Clear <p>After the last step, this test "wizard" would put the user back at step 3 for another test.</p>
